

**PROJECT NAME:** LIFT STATION EVALUATION AND REHABILITATION

**PROJECT LOCATION:** Everglades Holiday Park

**PROJECT DESCRIPTION:**

The main objective is to assess the condition of the existing sewer system and to analyze existing data and information gathered through observations, direct inspection, investigation and interviews with the maintenance staff at Everglades Holiday Park.

**THOMPSON & ASSOCIATES ROLE:**

As the E.O.R., we provided a detailed assessment of the existing sanitary sewer pump station and related force main and gravity sewer system at Everglades Holiday Park. The assessment determined the condition of the aging system, estimated the remaining useful life of the system and provided a summary report including recommendations and preliminary design plans for the rehabilitation and/or replacement of the infrastructure, as needed. A future phase will implement the recommendations in the summary report

**PROJECT START DATE:** February 2016

**PROJECT END DATE:** May 2016
