

**PROJECT NAME:** MIAMI DADE WATER AND SEWER DEPARTMENT CENTRAL DISTRICT PLANT CONTRACTOR'S TRAILERS SITE

**PROJECT LOCATION:** City of Miami, Miami Dade County, Florida

**PROJECT DESCRIPTION:**

The scope of service was to provide design services related to development of a contractor's trailers site at the Central District Wastewater Treatment Plant (Virginia Key). Services were implemented and coordinated directly with WASD's Consent Decree Program Manager and Construction Manager (PMCM).

**THOMPSON & ASSOCIATES ROLE:**

The design included all related water main extension, gravity sewer collection, sewage pump station with force main, gravel access road/site, grading and a power transformer required to facilitate over 20 construction trailers. Permits were obtained from City of Miami Building Department, Miami-Dade County RER for water main extension and sanitary sewer collection and disposal, and State of Florida Health Department. Construction inspection and administration was coordinated with the PMCM team during the construction phase and the close-out package was compiled and submitted to the County for approval.

**PROJECT START DATE:** April 2016

**PROJECT END DATE:** March 2019
